This Manual of Practice addresses the design of major pipeline or duct segments to be installed by horizontal directional drilling HDD. HDD is a trenchless excavation method that is accomplished in three phases and uses a specialized horizontal drilling rig with ancillary tools and equipment. Topics include predesign surveys, drilled path design, pipe design, construction impact, and asbuilt documentation. This new edition captures advances in drilling equipment, improvements for tracking, and considerations for using alternative pipe materials. MOP 108 is a guide for design engineers who have previous experience and knowledge of the HDD installation process and pipeline design methods. Then you can start reading Kindle books on your smartphone, tablet, or computer no Kindle device required. Show details.

View In Mobile Desktop Feedback. This supplemental manual takes equipment operators through a typical day of operation, outlining safety procedures for each critical step. Its easytofollow graphics and clearly stated safety warnings will help ensure operators understand the equipments operation, capacity, mechanisms, maintenance, and intended uses, and focuses on hazards associated with underground drilling including keyholing, cross boring, electrical strike, gas strike, fiberoptic strike, and water or sewage strike procedures. This manual is not a substitute for the manufacturer's manuals. 46 pages. 2014. Orders placed after 2pm CST or on a legal holiday will be processed the next day. Delivery times may be 25 business days after the order is processed. If a date has been selected in the Future Release date field, the order will be held and shipped on the date selected.
